

## **Key Changes Made During Refactoring**

1. Changed arr to tasks for better clarity.
2. Renamed renderTasks() to showTasks().
3. showTasks() → for displaying tasks.
4. saveTasksToLocalStorage() → for saving tasks.
5. loadTasksFromLocalStorage() → for loading saved tasks.
6. Added comments to explain what each section and line of code is doing.
7. Added proper indentation, spacing, and line breaks.
8. Added a message when the user tries to add an empty task: alert("Task cannot be empty").
